RE: Reconnaissance Level Characterization Report (RLCR) for the 800 Area Type 1 Cluster Closure
Project Buildings - Concurrence

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR for the 800 Area Type 1 Cluster Closure Project Buildings, Revision 0 dated June 15, 2001, which was received on August 16, 2001. Based on the information contained in this RLCR, as well as the supplemental data requested and provided, we are hereby concurring with the Type 1 designation for the 800 Area Type 1 Cluster Buildings. The 800 Area Type 1 Cluster facilities are identified as Buildings 830, 863, 864, 885, T883D, and Tanks Slabs 020, 021, and 026.

Although it is not necessary to provide a corrected copy, it was noted that Attachment A – The Facility Location Map does not properly identify Buildings 885 or 864.

It is indicated in this RLCR that the concrete from Buildings 885, 864 and 830 will be sent to a solid waste landfill as PCB Bulk Product Waste, even though the levels of PCBs appear to be below current soil action levels as well as "free-release" levels. If this decision were to change and the concrete to be considered for possible recycling, totals analysis must be submitted to properly determine that the concrete is inert (does not contain hazardous constituents above levels of concern) for Buildings 885 and 830.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

Steven H. Gunderson
RFCA Project Coordinator
